Exam experience

Answer
Maybe I am a minority here but I thought the exam will cover more advanced topics because I thought I will be able to use the questions to learn new things, things I did not know about.
It would have been nice to receive notification when the training environment was live.
No issue with the exam itself.
Some of the questions were unnecessarily tricky and I think more than one answer could be considered correct.
If I had purchased this exam rather than obtained it through the free offering I would be underwhelmed at the level of detail and thought put into the certification experience. It is significantly more entry-level than expected.
I wish part 1 had more tasks/dashboards to do. Also less step by step instructions and more just give me something to do and let the user interpret what the dashboard should look like. More questions on formulas. There were a couple of
